BianZhiDai is an open-source font designed by Xiaoyuan Gao(notyourtype foundry), its original appearance is inspired by shading characters in ASCII art and Chinese Woven Plastic bags. Previously constructed in GDC (GLYPHDRAWING.CLUB), it was turned into modular when doing the revision.

The first version was released in 18th November at VTF, it came in six styles: Base, Comic, Cube, pearl, Ring, Square.

This is the second version. With a steady structure, more decorative styles and stronger readability. Bianzhi dai is published with and by Velvetine Type Foundry.

I HOPE YOU WILL ENJOY IT! <3
